Professional Summary

Lead Software Engineer with 9+ years of backend engineering experience designing and operating distributed systems with Java 21, Spring Boot 3, AWS cloud infrastructure, Apache Kafka, Kubernetes, Redis, PostgreSQL, and MongoDB. Extensive experience building scalable microservices, optimizing database performance, and integrating AI model outputs into production backend workflows. Based in Chennai, India, targeting 100% remote engineering roles.

Core Technical Skills

Backend and Languages: Java (Java 8, 17, 21), Spring Boot 3.x, Spring Data JPA, Spring Security, REST APIs, Microservices Architecture, SQL

Cloud and Orchestration: AWS (EKS, ECS, S3, RDS, Lambda), Docker, Kubernetes, Helm, Istio Service Mesh, Jenkins, GitHub Actions

Data and Messaging: Apache Kafka, Redis, PostgreSQL, MongoDB, Oracle Database

Methodologies and Tools: Git, Agile/Scrum (PSM I, PSPO I), Prometheus, Grafana, Clean Architecture

Professional Experience

NCS Group

Lead Software Engineer | Dec 2021 - Present

Project: Vehicle-Related Licensing System 2.0 (Land Transport Authority)

- Architected and delivered cloud-native Spring Boot 3 and Java 21 microservices deployed on AWS (EKS, Kubernetes, Istio mTLS, Kafka, KEDA, Redis, ArgoCD) serving millions of users.
- Led Angular 13 to 18 migration, reducing redundant API calls by 40%.
- Maintained PostgreSQL and Redis data layers, ensuring transaction integrity and automated Flyway schema migrations.
- Mentored developers on clean architecture, unit testing, and automated release pipelines via Jenkins and GitHub Actions.

BlackStraw.AI

Senior Software Engineer | May 2021 - Nov 2021

Project: Promo Power Solution (AI Retail Forecasting)

- Engineered scalable Java and Spring Boot microservices connecting retail data feeds to machine learning inference endpoints.
- Deployed Apache Kafka streams and AWS Lambda processors to replace batch polling, moving data processing from batch intervals to real-time pipelines.
- Integrated PostgreSQL databases and secured RESTful endpoints for enterprise retail customers.

AllTech Systems (supporting Housing & Development Board)

Software Engineer | Aug 2019 - Dec 2020

Project: HDB Resale Portal

- Developed backend modules for eligibility checks, fee computation, and multi-tier approval workflows using Java, Spring, and Oracle Database.
- Built and consumed enterprise REST and SOAP web services, ensuring high data reliability and strict validation compliance.

Wolters Kluwer

Software Engineer | Jul 2018 - Jul 2019

Project: Legal View Bill Analyzer

- Developed Spring Boot microservices integrating AI model predictions with business rule evaluation for legal billing compliance.
- Utilized MongoDB for document storage and built RESTful endpoints supporting sub-second response times.

SysArc Infomatix

Associate Software Engineer | May 2016 - Jul 2018

Project: Lending Automation Processing System

- Developed backend Java services for loan processing, risk analysis, and document validation using JDBC and Oracle Database.

Education

Anna University, Chennai
Bachelor of Engineering | 2012 - 2016

Certifications

Professional Scrum Master I (PSM I)
Professional Scrum Product Owner I (PSPO I)
ICT Assessment Certification, NUS-ISS
