Professional Summary

Lead Software Engineer with 9+ years building and operating Java and Spring Boot backend services, cloud-native microservices, and distributed systems. Experience spans AWS, Kubernetes, Kafka, PostgreSQL, Redis, production delivery, and mentoring. Recent product work includes Spring AI, RAG, MCP, and Claude API workflows integrated with existing services.

Technical Skills

Backend: Java 8/17/21, Spring Boot 3, Spring Security, Spring Data JPA, REST APIs, microservices
Cloud and runtime: AWS GovCloud, EKS, ECS, Docker, Kubernetes, Helm, Istio, Terraform
Data and messaging: Kafka, Kafka Streams, PostgreSQL, Redis, MongoDB, Oracle
AI integrations: Spring AI, RAG, MCP, Claude API, agentic workflows, AI/ML inference integration
Delivery and observability: ArgoCD, Jenkins, GitHub Actions, Prometheus, Grafana, OpenTelemetry
Frontend: Angular, TypeScript, RxJS, NgRx, React, Next.js

Professional Experience

NCS Group

Lead Software Engineer | Dec 2021 - Present
Project: Vehicle-Related Licensing System 2.0 (Land Transport Authority)

- Architected and supported Java 21 and Spring Boot 3 microservices for a government licensing modernization on AWS GovCloud, using EKS, Istio, Kafka, KEDA, Redis, and ArgoCD.
- Integrated Spring AI, MCP, and Claude API agentic workflows with existing backend services; mentored developers and contributed to technical design.
- Led an Angular 13 to 18 migration that reduced redundant API calls by 40%; worked across PostgreSQL, CI/CD, Kubernetes, Prometheus, and Grafana.

BlackStraw.AI

Senior Software Engineer | May 2021 - Nov 2021
Project: Promo Power Solution (AI Retail Forecasting)

- Built Java and Spring Boot services and connected retail data feeds to AI/ML inference endpoints.
- Replaced batch polling with Kafka Streams, reducing reporting latency from more than 15 minutes to near real time.

AllTech Systems, supporting Housing and Development Board

Software Engineer | Aug 2019 - Dec 2020
Project: HDB Resale Portal

- Built eligibility, fee computation, and approval workflow features using Java, JSF, PrimeFaces, Oracle, WebLogic, and SOAP services.

Wolters Kluwer

Software Engineer | Jul 2018 - Jul 2019
Project: Legal View Bill Analyzer

- Built a Spring Boot service combining AI model predictions with Drools rules for legal billing compliance, with production latency below 500 ms.

SysArc Infomatix

Associate Software Engineer | May 2016 - Jul 2018
Project: Lending Automation Processing System

- Developed Java features for lending workflows covering risk analysis, document handling, and loan processing.

Education and Certifications

Bachelor of Engineering, Anna University, Chennai | 2012 - 2016
Professional Scrum Master I (PSM I) | Professional Scrum Product Owner I (PSPO I) | ICT Assessment Certification, NUS-ISS
