Location: India | Work authorization: India

Professional summary

Lead Software Engineer with 9+ years of experience designing, building, and operating Java and Spring Boot backend systems. Delivered REST APIs and event-driven services on AWS and Kubernetes, using Kafka, PostgreSQL, Redis, CI/CD, and observability. Recent work includes integrating Spring AI, RAG, MCP, and Claude API workflows into existing services. Also leads modernization work and mentors engineers.

Technical skills

- **Backend:** Java 21, Spring Boot 3, Spring Security, Spring Data JPA, REST APIs, microservices
- **Cloud and runtime:** AWS, EKS, ECS, Docker, Kubernetes, Helm, Istio
- **Distributed systems and data:** Kafka, Kafka Streams, PostgreSQL, Redis, MongoDB, Oracle
- **AI systems:** Spring AI, RAG pipelines, MCP servers, Claude API, agentic workflows, AI/ML inference integration
- **Delivery and operations:** ArgoCD, Jenkins, GitHub Actions, Terraform, Prometheus, Grafana, OpenTelemetry
- **Frontend:** Angular, TypeScript, RxJS, NgRx, React, Next.js

Professional experience

NCS, Singapore

Lead Software Engineer | Dec 2021 to Present

Project: Vehicle-Related Licensing System 2.0

- Architected Java 21 and Spring Boot 3 microservices for a government licensing system modernization.
- Built and supported cloud-native services on AWS Government Cloud using EKS, Istio mTLS, Kafka, KEDA, Redis, and ArgoCD.
- Used PostgreSQL, Redis, Kafka, Docker, Kubernetes, Jenkins, GitHub Actions, Prometheus, and Grafana.
- Led an Angular 13 to 18 migration that reduced redundant API calls by 40%, and rolled out Spring AI, MCP, and Claude API agentic workflows.
- Mentored developers on cloud-native engineering practices.

BlackStraw.AI

Senior Software Engineer | May 2021 to Nov 2021

Project: Promo Power Solution

- Developed Java and Spring Boot services for retail trade promotion workflows.
- Worked with Kafka, AWS Lambda, PostgreSQL, REST APIs, Jenkins, and SonarQube.
- Connected retail data feeds to AI/ML inference endpoints and replaced batch polling with Kafka streams, reducing reporting latency from 15+ minutes to near real time.

AllTech Systems, supporting Housing Development Board

Software Engineer | Aug 2019 to Dec 2020

Project: Housing Development Board Resale Portal

- Built features for a resale portal covering eligibility checks, fee computation, and multi-level approval workflows.
- Worked with Java, JSF, PrimeFaces, Oracle Database, WebLogic, SOAP web services, and SVN.

Wolters Kluwer

Software Engineer | Jul 2018 to Jul 2019

Project: Legal View Bill Analyzer

- Built a Spring Boot service combining AI model predictions with Drools rule evaluation for legal billing compliance, with production latency below 500 ms.
- Worked with MongoDB, REST APIs, AI/ML model integrations, Jenkins, Git, and SonarQube.

SysArc Infomatix

Associate Software Engineer | May 2016 to Jul 2018

Project: Lending Automation Processing System

- Developed Java features for lending workflows covering risk analysis, document handling, and loan processing.
- Worked with Struts, JSP, Oracle Database, WebLogic, JDBC, and SVN.

Certifications

- Professional Scrum Product Owner I
- Professional Scrum Master I
- ICT Assessment Certification, NUS-ISS

Education

- Anna University, Chennai | 2012 to 2016.
