MEENA KANNAN

Principal / Lead Java 21 & Distributed Systems Consultant | Spring Boot 3, Kafka Streams, AWS EKS & Istio (Global B2B)

India & Global Remote | +91 97893 02084 | meenakannan92@gmail.com | linkedin.com/in/meena-kannan-mk | github.com/meenak95

PROFESSIONAL SUMMARY

Distributed Systems & Backend Technical Lead (9+ Yrs) specializing in monolith-to-microservices modernisation, high-throughput Apache Kafka event choreography (Outbox & Saga patterns), Kubernetes (EKS/Helm/Istio mTLS), and multi-database reliability (Oracle DB, PostgreSQL, Redis). Set up in India for rapid Global B2B onboarding.

SELECTED IMPACT & ARCHITECTURE HIGHLIGHTS

- Led end-to-end monolith decomposition into cloud-native Java 21 / Spring Boot 3 microservices serving millions of users.
- Engineered high-throughput Kafka Streams, KEDA event-driven autoscaling, and Redis caching layers eliminating timeout cascades.
- Standardised zero-downtime GitOps releases via ArgoCD, Jenkins, GitHub Actions, SonarQube, Vault, and OpenTelemetry.
- Authored technical architecture decision records (ADRs) and handover specifications across 8 core licensing domains.

CORE EXPERIENCE

Lead Software Engineer | NCS (Client: Land Transport Authority - VRLS 2.0) (Dec 2023 - Present)
Java 21, Spring Boot 3, AWS EKS/ECS, Istio mTLS, Kafka, KEDA, Redis, Angular 18 (-40% redundant API calls), ArgoCD, Spring AI & MCP.

Application Consultant | NCS (Client: LTA VRLS Platform) (Dec 2021 - Dec 2023)
Technical owner of live VRLS platform across 8 licensing modules (Java, Spring MVC, Oracle DB, Kafka, JMS).

Senior Software Engineer | BlackStraw.AI (India) (May 2021 - Nov 2021)
Built Spring Boot + Apache Kafka real-time AI inference pipelines cutting reporting delays from 15+ mins to near real-time.

Software Engineer | HDB Portal Systems (Aug 2019 - Dec 2020) & Wolters Kluwer LegalTech AI (Jul 2018 - Jul 2019)
Engineered sub-500ms AI + Drools BRMS legal billing compliance engine and HDB regulatory transaction workflows.
